

3/16 COVID-19

Mon, Mar 16, 2020 at 11:08 AM

Greetings Harrisonburg EMU Students,

Last night, we were alerted to a student on the Harrisonburg campus who showed some signs of illness. This student was taken to the hospital, has been tested for COVID-19, and is receiving medical care in an isolated location on campus.

In keeping with CDC protocols, the test results will take several days. Students who have been in contact with this individual have been alerted and are currently in isolation on campus.

Because we want to take the highest caution, there are new actions we are taking for collective health. Students, please make arrangements to return home. Fill out [this form](#) to notify Residence Life staff that you are departing.

We recognize there are barriers for some to return home. If you need to remain on campus, we are preparing a waiver. Your waiver must be approved by EMU.

It is imperative that we continue with everyone in the campus community to practice preventive health measures.

The health and safety of our students, faculty and staff is our top priority. We will continue to work across the university to provide guidance and resources and to share the latest information.

Continue to be in communication with your professors about classes. Student Life is available for support with ongoing steps. For more information, visit www.emu.edu/coronavirus.
