
COVID-19 test results NEGATIVE

Fri, Mar 20, 2020 at 4:58 PM

Greetings Campus Community,

I am happy to report test results for an Eastern Mennonite University student were negative for COVID-19. The Virginia Department of Health released the results on March 20.

As per HIPAA/FERPA guidelines, we maintain anonymity for this student. We are grateful to report, however, that the student is doing much better and is engaged in online courses.

This is good news for the individual and for the community here at Eastern Mennonite University. We are grateful for the conscientious efforts of our students, faculty, staff and parents as they awaited the results, and we wish our student a quick recovery.

If we learn that a member of the EMU community has been diagnosed with COVID-19, we will immediately share that information with the campus community. Updates are also available at www.emu.edu/coronavirus.

We continue to pray for the health of all our students, faculty and staff, and for the larger EMU community. We invite you to pray with us for our world and our communities as we live into what it means to lead together in these uncertain times.
