

Dear EMU Parents,

We share your concerns and this information with thanks for your patience in this difficult time.

Test results for an Eastern Mennonite University student were negative for COVID-19. The Virginia Department of Health released the results today.

As per HIPAA/FERPA guidelines, we maintain anonymity for this individual. We are grateful to report however that the student is doing much better and is engaged in online courses.

This is good news for the student and for the community here at Eastern Mennonite University. We are grateful for the conscientious efforts of our students, faculty, staff and parents as they awaited the results, and we wish the student a quick recovery.

If we learn that a member of the EMU community has been diagnosed with COVID-19, we will immediately share that information with the campus community.

Updates are also available at

[www.emu.edu/coronavirus](http://www.emu.edu/coronavirus).

We continue to pray for the health of all our students, faculty and staff, and for the larger EMU community. We invite you to pray with us for our world and our communities as we live into what it means to lead together in these uncertain times.

Susan Schultz Huxman, President

President's Office  
Eastern Mennonite University  
1200 Park Road, Harrisonburg, Virginia, 22802
