2. Please list two or three common traits and strengths you have noticed in the EMU students you have had the opportunity to work with:

2021 Comments:

Adequately prepared at appropriate levels (Entering Practicum, internship, and workforce). Willingness to do something other than strictly outpatient comfort counseling.

Open-minded, non judgemental presence, wonderful listeners.

Open to diversity & Enthusiastic to learn

They tend to be well prepared diagnostically. They have all been empathetic and professional and their relations with clients. Oh thank you what's in the back right now that's all that's all right now

Willingness to learn different things to accommodate the clients, if it is something the student is not familiar with. Open to constructive criticism and responsive to it.

Empathy, genuineness

3. What thoughts or recommendations do you have for us to better prepare our students for work in the field?

2021 Comments:

As with all counseling programs I'm aware of: Working with Serious Mental Illness population. such as how to navigate A/V hallucinations and delusional thought content

Talking through the process of note taking and the language typically used.

Have clearer expectations of the program and the site to the student at the beginning to not have confusion once started.

Perhaps more focus on children and youth diagnosis and treatment.

Clear expectations of internships and practicums

Maybe realistic expectations for jobs post graduation

Solid overall with the exception of SMI.

They generally have a sound foundation upon which to build. They are professional and always seem to have the needs of their clients as primary importance.
